Full Case Studies & Prototypes: omnia-amer.github.io/portfolio

PROFESSIONAL SUMMARY

Senior UI/UX Designer with 5+ years of experience designing bilingual (Arabic/English, RTL/LTR) digital products for government ministries, public authorities and enterprise clients across Qatar, Saudi Arabia, the UAE and Egypt. Shipped 17 products for 8+ government and public-sector institutions — including a national digital ministry, a pensions authority and a national standards body — translating dense regulatory and multi-stakeholder requirements into interfaces citizens and staff can use with confidence, end-to-end from user research and information architecture through to production-ready design systems and developer handoff. Co-designed a national donation platform that earned an official **Guinness World Records** recognition (2023). Full case studies, wireframes and UI walkthroughs are linked above.

CORE SKILLS

UX Research & Strategy	User Research, Market Research, Design Thinking Methodology, User Journey Mapping, User Personas, Empathy Mapping, Affinity Diagrams, Usability Testing, Information Architecture, Requirement Synthesis
UI Design & Prototyping	Wireframing, UI Prototyping, User Flows, Storyboarding, User-Centered Design, Visual/UI Design, High-Fidelity Prototyping

Specialized Domains	Government & Regulatory UX, Multi-Stakeholder Enterprise Platforms, Dashboards & Financial Reporting UX, Self-Service & Kiosk UX
Tools & Software	Figma, Adobe XD, Photoshop, Illustrator, Zeplin, Miro, Notion, ClickUp, Jira

PROFESSIONAL EXPERIENCE

UI/UX Designer — Mannai Corporation	Oct 2024 – Present
Doha, Qatar · Full-time	
Engaged as UX/UI Consultant across 11 concurrent government and enterprise clients, including Qatar National Library, MCIT (Qatar's Digital Ministry), GRSIA ("Daman"), Qatar University, the Ministry of Environment & Climate Change, Al-Awalia (QPMC), Manateq, TRAGS, the Community College of Qatar, the General Authority for Minors' Affairs, and Qatar Stars League.	
- Designed one reusable homepage and design-system template for Qatar National Library that scaled across the public site and multiple internal staff microsites, standardizing the experience without flattening distinct content types (news, media, shared documents, correspondence). - Redesigned MCIT's shared operations calendar and public careers portal, giving every ministry department one place to coordinate initiatives under Qatar's Digital Agenda 2030. - Rebuilt GRSIA's public identity ("Daman") into one consistent design system spanning five distinct content types — news, magazine, media center, archive and enhanced pension services. - Designed a national environmental-permit self-check flow for the Ministry of Environment & Climate Change, turning multi-step regulatory logic into a guided, plain-language applicant journey. - Built a single drill-down financial-compliance dashboard template for Qatar Stars League, reused across league-wide, division, club and individual-player contract views for 20+ member football clubs. - Designed a bilingual self-service student portal for the Community College of Qatar covering 50 services across registration, requests and graduation workflows for students, advisors and staff.	
UI/UX Designer — Saudi Azm	Sep 2024 – Sep 2025
Riyadh, Saudi Arabia · Part-time	

Engaged as UX/UI Consultant for the Saudi Standards, Metrology & Quality Organization (SASO), Mehrab, and Maneh.

- Redesigned SASO's public service catalogue (20+ licence and permit types) around a lookup-first request pattern, replacing multi-section technical forms with a single certificate-number search.
- Designed Mehrab's national mosque-donation platform (SAR 1.5M+ raised at time of writing), scoping every mosque case with its own address, capacity and progress tracker.

UI/UX Designer — AZM X

Jan 2023 – Nov 2024

Saudi Arabia · Full-time

- Designed Jood Eskan's national donation platform and a self-service donation kiosk for high-footfall public spaces; the campaign earned an official **Guinness World Records** recognition in April 2023.
- Designed UX for the Social Development Bank and for Saudi Arabia's national E-Invoice platform.

UI/UX Designer — Alborhan Academy

Oct 2022 – Feb 2023

Saudi Arabia · Full-time

- Designed Surah App, a bilingual Qur'an study application spanning reading, translation and classical tafsir.

UI/UX Designer — Webtek

Oct 2022 – Feb 2023

Dubai, UAE · Full-time

- Designed Optimum Vision, a concierge app for tourists and investors in Dubai organized around 5 service categories; shipped live on the App Store.

UI/UX Designer — Content X

Aug 2021 – Feb 2022

Egypt · Full-time

UI Designer — EVERVIPE Media

Feb 2021 – Jul 2021

Egypt · Full-time

EDUCATION & TEACHING
